

NAME

File::Spec::OS2 - methods for OS/2 file specs

SYNOPSIS

```
require File::Spec::OS2; # Done internally by File::Spec if needed
```

DESCRIPTION

See *File::Spec* and *File::Spec::Unix*. This package overrides the implementation of these methods, not the semantics.

Amongst the changes made for OS/2 are...

`tmpdir`

Modifies the list of places temp directory information is looked for.

```
$ENV{TMPDIR}  
$ENV{TEMP}  
$ENV{TMP}  
/tmp  
/
```

`splitpath`

Volumes can be drive letters or UNC sharenames (\\server\\share).
